Routine Maintenance

Follow these simple care and maintenance tips to keep your Evolution Laminate Floor looking its best.

Keep your floor clean by using a broom, dust mop or vacuum. Be sure to clean liquid spills immediately with a clean dry cloth.

To clean large soiled areas we recommend using a flat microfibre mop and a dedicated laminate flooring cleaning product. Ask your retailer for more information.

Spray the cleaning solution onto the flat microfibre mop, do not saturate or over wet the mop. Do not leave moisture behind on the mopped area - the floor should stay almost dry.

NEVER WET MOP THE FLOOR. It will damage your floor.

Do not use soap based detergents, as these may leave a dull finish on your floor.

Do not use abrasive cleaners, steel wool or scouring powder as these may scratch your floor.

Do not wax, polish, sand or lacquer your laminate floor as it already has a protective finish.

Do not use chairs with caster wheels. They may damage the surface.

Do not slide chairs across the floor when sitting or slide heavy furniture across the floor as this may damage the surface.

Use doormats outside each entrance to your home to prevent dirt, sand, grit and other substances such as oil, asphalt and driveway sealer from being tracked onto your floor.

For furnishings use wide bearing, non staining, floor protectors such as clear, hard plastic or non staining felt protectors for heavy furnishings.

The overall stain resistance of our Evolution Laminate floors is excellent and most spills will wipe off quickly and easily with a clean cloth. Any permanent damage can be easily fixed by replacing the boards.
